About the Earth Science exam: Points needed to reach benchmark scores

Based on the conversion chart provided by NYSED for the June 2023 Regents Earth Science exam.

How does the Performance Test (lab) affect a student's scale score?

Lab contributes up to 15 scale points: in the graph, the vertical distance from the grey line to the blue line is always 15 scale points.

Lab is curved: a student who earns <u>half</u> of the available <u>raw</u> points on the lab (8 out of 16) gets <u>two thirds</u> of the <u>scale</u> points contributed by the lab (10 out of 15).

To score 80: written 53 & lab 16 / written 59 & lab 8 / written 75 & lab 0
